Summary

Enthusiastic and experienced Full-Stack Developer with a strong foundation in building quality software and scalable systems. With a proven track record of leading teams, refining developer experiences, and delivering impactful projects, I excel at problem-solving and adapting to new challenges in fast-paced environments.

Quick Guide

- **Full-Stack Expertise:** Proficient in frontend technologies (React, Next.js, React Native) and backend frameworks (Node.js, FastAPI, Golang, Django).
- **Tech Leadership:** Experienced in leading development teams and driving architectural decisions.
- **Scalable & Robust Design:** Skilled in designing systems that efficiently handle high loads and ensure maintainability.
- **Cloud & DevOps:** Strong working knowledge of AWS, GCP, Terraform, and CI/CD pipelines.
- **AI & Innovation:** Proven experience in developing AI-based solutions, including fine-tuning GPT models to enhance chatbot capabilities.

Experience

- **Sr. Software Developer — Tech Lead — Cuilsoft** March 2024 – Present
 - Leading development efforts, mentoring team members, and driving key architectural decisions.
 - Spearheading projects that enhance product quality and operational efficiency.
- **Software Developer — Cuilsoft** June 2021 – March 2024
 - Developed internal tools, POCs, and customer-facing applications.
 - Collaborated on multiple projects, establishing coding practices that improved performance.

Projects at Cuilsoft

- **Tradecafe**
 - Upgraded a React Native application from v0.53 to v0.73.
 - Developed buyer's application components including data tables, filters, screen layouts, and data fetching.
 - Integrated notifications and authentication.
 - Implemented infinite loading with rapid refresh capabilities to efficiently handle thousands of documents.
- **Quartermaster Chatbot**
 - Developed an AI-based chatbot and vector search for Quartermaster, a platform for finding household assistance.
 - Introduced innovative methods for booking appointments and tailored professional searches.
 - Created a conversation tagging system for internal teams to mark conversations as good or bad.
 - Fine-tuned GPT-4o on Azure AI Foundry using the tagged conversations, enhancing chatbot performance.
- **Padder**
 - Developed and deployed an end-to-end rent guarantor system.
 - Integrated third-party providers for insurance and KYC.
 - Implemented a Stripe payment system.

- Designed dynamic forms for questionnaires, invitations, and authentication using Clerk.
- Built an admin panel to manage approvals and additional functionalities.

- **PerfectDraft**

- Developed a checkout page using vanilla JavaScript.
- Created a reusable form management library (implemented as a `Form` class) supporting subscription to form/field changes, JSON schema-based validation, default values, and state management.
- Enhanced maintainability through multiple reusable functions.

Personal Projects

- **Go HTMX Task Manager** (GitHub: github.com/Badhan-abhishek/go-htmx-2)
 - A task manager built using Go, HTMX, Gorm, and TailwindCSS for efficient project and task management.
- **RNAM** (GitHub: github.com/Badhan-abhishek/rnam)
 - A simple web application that generates random user data for testing purposes.

Education

- **Bachelor of Technology in Computer Science** — Kurukshetra University August 2016 – December 2020

Skills

TypeScript (Advanced)	Node.js / FastAPI / Django (Intermediate)
JavaScript (Advanced)	Terraform (Intermediate)
Python (Intermediate)	AWS / GCP (Advanced)
Golang (Intermediate)	Git (Intermediate)
React / Next.js (Advanced)	Docker (Intermediate)
React Native (Intermediate)	

Languages

- English (Advanced)
- Hindi (Advanced)
